BUDHA DAL PUBLIC SCHOOL, PATIALA First Term Examination (September 2024) Subject: EVS 2 Class IV Set A

Set A

Time: 2 1/2 hrs	MM:60

1. Towards which direction of the Himalayas do the Northern Plains lie? a) north b) south c) east d) west 2. Which of the following animal is found in the Himadri range? a) yak b) camel c) horse d) elephant 3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet a) boundary b) horizon d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	Q1. Choose the correct answ	er:	(8)
a) north c) east d) west 2. Which of the following animal is found in the Himadri range? a) yak b) camel c) horse d) elephant 3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	1. Towards which direction of the H	imalavas do the Northern Plains lie?	
c) east d) west 2. Which of the following animal is found in the Himadri range? a) yak b) camel c) horse d) elephant 3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c) interval d) coordinates 8. Name the line where the Earth and the sky appear to meet a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.			
2. Which of the following animal is found in the Himadri range? a) yak b) camel c) horse d) elephant 3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c) interval d) coordinates 8. Name the line where the Earth and the sky appear to meet a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.			
a) yak c) horse d) elephant 3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: [6] 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	2. Which of the following animal is f	선물에 발표하는 경기 어린 아이들은 사람들은 사람들은 사람들이 되었다. 그렇게 그렇게 하는 것이 없는 것이 없는 것이 없는 것이 없는 것이 없었다.	
c) horse d) elephant 3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: Q3. Fill in the blanks: [6] 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.			
3. Which part of a river falls in the lower course? a) creek b) peninsula c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	c) horse		
a) creek c) mouth d) source 4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	3. Which part of a river falls in the lo		
4. What are smaller rivers which join the main river called? a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: Q2. Fill in the maginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.			
a) distributaries b) sediments c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: Q2. Fill in the maginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	c) mouth	d) source	
c) tributaries d) delta 5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: Q3. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	4. What are smaller rivers which join	the main river called?	
5. What is a flat area of land on the surface of the earth called? a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: [6] 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	a) distributaries	b) sediments	
a) plain b) plateau c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: Q3. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	c) tributaries	d) delta	
c) hill d) mountains 6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c) interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: Q2. Fill in the blanks: [6] 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	5. What is a flat area of land on the	surface of the earth called ?	
6. Which of these animals is not found in the Northern Plains? a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	a) plain	b) plateau	
a) lion b) elephant c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: [6] 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	c) hill	d) mountains	
c) rhinoceros d) snow leopard 7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	Which of these animals is not found	nd in the Northern Plains ?	
7. What is half of the Earth known as? a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet. a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	a) lion	b) elephant	
a) hemisphere b) tropic c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet . a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	그 아무리 가게 하는데 그는 그가 하게 하게 하고 있었다. 그는 그 아이를 모르는데 하는데 하는데 아니는 살이 모르는데 되다고 그리고 있다.		
c)interval d) coordinates 8. Name the line where the Earth and the sky appear to meet . a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	7. What is half of the Earth known as	5?	
8. Name the line where the Earth and the sky appear to meet . a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	a) hemisphere	b) tropic	
a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	그 없는 사람들은 사람들이 열차하게 살려면서 한국에 있으면 내가 그렇게 그 사람들이 나는 사람들이 있는 사람들이라는 사람이 없는 것이다.		
a) boundary b) horizon c) axis d) diameter Q2. Fill in the blanks: (6) 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	8. Name the line where the Earth an	d the sky appear to meet .	
Q2. Fill in the blanks: 1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.			
1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	c) axis	d) diameter	
1. The Earth is the planet from the Sun. 2 are the imaginary lines which connect the North and South Poles. 3. A/An is a large piece of ice floating in the sea.	Q2. Fill in the blanks:		(6)
 are the imaginary lines which connect the North and South Poles. A/An is a large piece of ice floating in the sea. 			(6)
 are the imaginary lines which connect the North and South Poles. A/An is a large piece of ice floating in the sea. 	1 The Farth is the	not from the Com	
3. A/An is a large piece of ice floating in the sea.	2 are the imaginary lines	which comment the New York	
s. AyAn is a range piece of ice floating in the sea.	3 A/An is a large piece of	ing floating in the North and South Po	oles.
/ The place where a river begins its income	4. The place where a river begins the	rice floating in the sea.	
4. The place where a river begins its journey is called its	5 rango is the other	ourney is called its	
5 range is the other name of Outer Himalayas. 6. The Northern Plains are the most region of India	6. The Northern Plains are the	of Outer Himalayas.	

(5)

- 1. The Earth's rotation causes day and night.
- 2. Dams help to hold water and generate electricity.
- 3. Bhakra Nangal dam is built on the Indus river.
- 4. There are five basins in the Northern Plains
- 5. The Arctic ocean is the shallowest of the world's oceans.

Q4. Match the following

(3)

1. sphere	India's breadbasket
2. Jupiter	top of a mountain
3 deepest point	687 days

3. deepest point

Pacific ocean 4. peak 4331 days 5. Mars

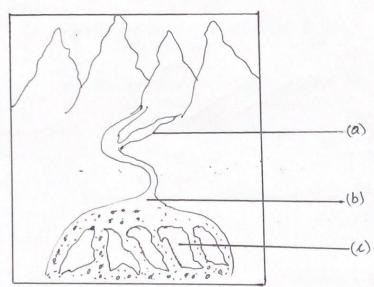

6. Punjab

shaped like a ball

Q5. Label the diagram of delta:

(3)

(5)

Q6. Mark the following states on the political map of India:

- 1. Punjab
- 2. Uttar Pradesh
- 3. Bihar
- 4. Sikkim
- 5. Nagaland

Q7. Answer the following questions in short:

 Which longitude divides the Earth into two equal halves? What as halves known as? Why sailors in ancient times were afraid of sailing in the same dir 	(2)
for too long?	(2)
3. Name the continent on which people cannot live. Why?	(2)
4. What are sediments? In which areas does a river deposits sedime	nts
during its journey?	(2)
5. Define 'mountain range' and give one example.	(2)
6. Which region in India would be the most suitable for growing whe	at
and rice crops? Why?	(2)
7. What is a river basin? Give any two examples.	(2)
Q8. Answer the following questions in detail:	
 Why are the Northern Plains densely populated? 	(3)
2. Mention two ways in which rivers are helpful to people. How does	
pollution of rivers affect these activities?	(3)
3. What is meant by revolution? How long does the Earth take to	
complete one revolution?	(3)
4. Why do we need to protect animals in national parks when we can	(0)
See them in zoos?	(3)
Q9. Attempt any one of the following questions:	
Mention two reasons why we need to look after rivers. Describe to ways in which you can help to look after rivers.	wo
OR	(4)
Write four uses of the Himalayan Range.	/
